**Cayton School**  
**Maths Progression Map**

*Learn from yesterday, seek today and aim for tomorrow*

Intent							
Cayton School Vision	<b>“To deliver the highest standards enabling children and adults to grow, learn and work together where laughter, respect, trust and harmony are highly valued”</b>						
Cayton School Values	Happy and Harmonious	Confident and Caring	Lively and Life-Long-Learning	Successful and Secure	Proud and Positive	Challenge and Commitment	
Why Cayton School Curriculum is unique	We have written our curriculum with a strong emphasis towards Local: Community, History, Geography, Culture and Faith	Our Curriculum has a rich knowledge base and strong skills development	A strong emphasis on vocabulary allows children to learn and apply words in a variety of contexts	Cultural Capital opportunities support children to accomplish the very best they can be	PSHE is a thread that runs throughout our Curriculum	We have written the Curriculum to support children to develop lively, enquiring and creative minds	We understand the importance of a healthy body, healthy mind which is prioritised throughout our Curriculum
<b>Intent</b>	Our overriding belief at Cayton School is that our role as Educators is to ensure children are prepared for the future and have the skills to be life long, curious learners. We passionately believe that life skills as well as academic success is vitally important. Our curriculum is designed to ensure life-long learners who are kind, confident and successful. Our designing of our bespoke curriculum was underpinned by evidence and research in order to challenge thinking and encourage enquiry.						
<b>Cayton Awards Culture</b>	<b>C - Courage</b>	<b>A - Achievement</b>	<b>Y – Your Actions</b>	<b>T - Tolerance</b>	<b>O – Our World</b>	<b>N - Nurturing</b>	
Implementation							
Delivering the Curriculum	A whole school, topic based approach	A strong emphasis on positive behaviour through Cayton Awards	A whole school approach to PSHE	Opportunities for collaborative and shared work	The importance of Reading is implemented throughout our Curriculum offer	Every child has a Cayton, Cultural, Capital, Citizenship Passport throughout school	
Evidence Based Research	Metacognition 'learning to learn' using scaffolding strategies EEF evidence		Language skills at the centre of Quality First Teaching Rose Report/ EEF		English Curriculum delivery has a strong emphasis on vocabulary and reading Reading spine Doug Lemov		The power of 'empowerment' Dr Raj Persaud/ Hertzog Performance=Skills x Motivation
Pedagogy	Importance of staff well-being	Emphasis on continued professional empowerment Abraham Maslow's Hierarchy of Needs	Monitoring and coaching supporting good practice throughout school	Golden thread supporting school development	Positive culture of fairness and equality	Strong 'Safeguarding' culture throughout school	A welcoming, supportive and inclusive school at the heart of everything we do
Processes and Procedures	A strong focus on assessment for learning throughout school	Training and empowerment of subject leaders to lead their subjects		Clear guidance and structure in teaching core subjects	Robust assessment of core and foundation subjects throughout school		Clear rules and routines set out to support all children
<b>Implementation</b>	Professional Development and Empowerment of staff supports pedagogical theories and research and equips all teachers to confidently deliver and implement the Curriculum. We implement clear structures and teaching sequences, which underpin the teaching of Reading, Writing and Mathematics. The whole curriculum is taught through 'Metacognitive' pedagogy which encourages children to 'learn to learn' and self-regulate, thus enabling them to question their learning.						
<b>Cayton Awards Culture</b>	<b>C - Courage</b>	<b>A - Achievement</b>	<b>Y – Your Actions</b>	<b>T - Tolerance</b>	<b>O – Our World</b>	<b>N - Nurturing</b>	
Impact							
What 'success' looks like at Cayton School	Children develop self-confidence and self-esteem	High Quality Outcomes for all children based on their starting points		Strong feeling of Community	A rich and diverse school culture		Children prepared for life-long learning
Ambition	Children and adults are proud of themselves and proud to be part of the Cayton Community	Progress and attainment at each Key Stage shows outcomes as being above the 'National Average'		Children and adults are kind, courteous and confident	Adults are a positive role model in all that they do and say		Children are self -regulated in their learning and take responsibility for their actions
Evidence	Outcomes at each stage of learning	Pupil and staff voice		Impact of school development priorities	Stakeholder feedback	Formal and Informal assessments	A positive Cayton Awards Culture throughout school
<b>Cayton Awards Culture</b>	<b>C - Courage</b>	<b>A - Achievement</b>	<b>Y – Your Actions</b>	<b>T - Tolerance</b>	<b>O – Our World</b>	<b>N - Nurturing</b>	

**Developing Mathematicians at Cayton School**

**A Mathematician at Cayton School will ...**

- have a secure understanding of the number system and place value.
- seek out patterns and trends within number.
- formulate conjectures about numbers and problems.
- be fluent and efficient when calculating and working with number.
- establish truth through reasoning and problem solving.
- identify and link methods to real-life problems.
- recall facts and prior knowledge to inform new methods and concepts.
- build on prior knowledge to enhance their understanding.

### Ambition

Learning and aiming for the future is at the heart of learning in Mathematics at Cayton. Our mathematics curriculum at Cayton School provides children with a foundation for **understanding number, reasoning, thinking logically and problem solving** with resilience so that they are fully prepared for the future. We do this by using every opportunity to include a varied approach to mathematics that include fluency, reasoning and problem solving. It is essential that these keystones of Mathematics are embedded throughout all strands of the National Curriculum. By adopting a Mastery approach, it is also intended that all children, regardless of their starting point, will maximise their academic achievement and leave Cayton School with an appreciation and enthusiasm for Maths, resulting in a lifelong positive relationship with number. We do this by:

- ensuring that we deliver a high quality maths curriculum that is both challenging and enjoyable.
- enabling children children to make rich connections across mathematical ideas to develop fluency, mathematical reasoning and competence in solving increasingly sophisticated problems.
- allowing our pupils to be able to apply their mathematical knowledge to science and other subjects.
- showing that maths is essential to everyday life and that our children are confident mathematicians who are not afraid to take risks.
- developing independent learners with inquisitive minds who have secure mathematical foundations and an interest in self-improvement.
- encouraging children to build upon their knowledge, understanding and skills from EYFS to Year 6

### Special Educational Needs and Disabilities (SEND) Inclusive Provision for Mathematics

In Mathematics, we adopt a mastery approach that enables every child to engage and achieve their full potential and have a deeper understanding of concepts that are taught no matter what their prior ability. Where possible, children should be working towards a common goal and working on the same material which increases in difficulty as the task progresses. Tasks may be scaffolded in different ways to enable learners to understand and progress in knowledge and skills.

At Cayton, we use a concrete, pictorial and abstract approach to allow a range of learning styles to achieve and see Maths in new ways. This allows children to physically see the Maths in motion and children can relate the manipulation of resources to the extension of abstract ideas and concepts. Planning for these opportunities should be reactive in the planning and adapted to allow for reflection time of concepts and consolidation time of methods. We believe in embracing mistakes to build a good resilience in mathematics and where they are seen as a learning opportunity.

To enable Mastery, some of the following adaptations may be used:

- Pre-teaching group work looking at specific vocabulary or concepts in Mathematics that the children may find tricky.
- Small group support of an adult to guide them through the activities they are given.
- 1:1 support where and when necessary.
- Word mats that explain some of the key concepts or vocabulary of Mathematics to help the children understand further.
- Knowledge organisers to start Mathematics units to refer back to if they are unsure of a particular concept such as place value knowledge, square number knowledge or representations of fractions.
- Further resources around the classroom to help further understand concepts such as counters, number fans, beads, place value charts.
- Adapted worksheets to help with the understanding of wording or explanations.

In planning and guiding what children learn, practitioners must reflect on the different rates at which children are developing and adjust their practice appropriately. Three characteristics of effective teaching and learning are:

- playing and exploring - children investigate and experience things, and 'have a go'
  - active learning - children concentrate and keep on trying if they encounter difficulties, and enjoy achievements
  - creating and thinking critically - children have and develop their own ideas, make links between ideas, and develop strategies for doing things
- In addition, the Prime Areas of Learning (Personal, Social and Emotional Development, Communication and Language and Physical Development) underpin and are an integral part of children's learning in all areas.

### EYFS Mathematics (Statutory)

Developing a strong grounding in number is essential so that all children develop the necessary building blocks to excel mathematically. Children should be able to count confidently, develop a deep understanding of the numbers to 10, the relationships between them and the patterns within those numbers. By providing frequent and varied opportunities to build and apply this understanding - such as using manipulatives, including small pebbles and tens frames for organising counting - children will develop a secure base of knowledge and vocabulary from which mastery of mathematics is built. In addition, it is important that the curriculum includes rich opportunities for children to develop their spatial reasoning skills across all areas of mathematics including shape, space and measures. It is important that children develop positive attitudes and interests in mathematics, look for patterns and relationships, spot connections, 'have a go', talk to adults and peers about what they notice and not be afraid to make mistakes.

### EYFS Mathematics

Number	Number facts	Numerical Patterns	Measure, Shape and Space	Key vocabulary
<ul style="list-style-type: none"> <li>• <b>Have a deep understanding</b> of number to 10, including the composition of each number;</li> <li>• <b>Subitise</b> (recognise quantities without counting) up to 5</li> </ul>	<ul style="list-style-type: none"> <li>• Automatically <b>recall</b> (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts.</li> </ul>	<ul style="list-style-type: none"> <li>• Verbally <b>count</b> beyond 20, <b>recognising</b> the pattern of the counting system;</li> <li>• <b>Compare</b> quantities up to 10 in different contexts, recognising when one quantity is greater than, less than or the same as the other quantity;</li> <li>• <b>Explore and represent</b> patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally.</li> </ul>	<ul style="list-style-type: none"> <li>• Safely <b>use</b> and <b>explore</b> a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function; including measuring.</li> <li>• <b>Recognise</b> a range of shapes and link items that have the same shape.</li> </ul>	<p><b>Use</b> enriching and widening children's vocabulary that will support later reading comprehension</p> <p>See vocabulary sheets.</p>
<ul style="list-style-type: none"> <li>• Count</li> <li>• Read and write</li> <li>• Identify</li> <li>• Represent</li> </ul>	<ul style="list-style-type: none"> <li>• Recall</li> <li>• Count</li> <li>• Add</li> <li>• Subtract</li> </ul>	<ul style="list-style-type: none"> <li>• Count</li> <li>• Compare</li> <li>• Explore</li> <li>• Represent</li> </ul>	<ul style="list-style-type: none"> <li>• Use</li> <li>• Explore</li> <li>• Recognise</li> </ul>	<ul style="list-style-type: none"> <li>• Use</li> <li>• Explore</li> </ul>

### Key Stage 1

#### Purpose of Study

Mathematics is a creative and highly interconnected discipline that has been developed over centuries, providing the solution to some of history's most intriguing problems. It is essential to everyday life, critical to science, technology and engineering, and necessary for financial literacy and most forms of employment. A high-quality mathematics education therefore provides a foundation for understanding the world, the ability to reason mathematically, an appreciation of the beauty and power of mathematics, and a sense of enjoyment and curiosity about the subject.

#### National Curriculum

The principal focus of mathematics teaching in key stage 1 is to ensure that pupils develop confidence and mental fluency with whole numbers, counting and place value. This should involve working with numerals, words and the four operations, including with practical resources [for example, concrete objects and measuring tools]. At this stage, pupils should develop their ability to recognise, describe, draw, compare and sort different shapes and use the related vocabulary. Teaching should also involve using a range of measures to describe and compare different quantities such as length, mass, capacity/volume, time and money. By the end of year 2, pupils should know the number bonds to 20 and be precise in using and understanding place value. An emphasis on practice at this early stage will aid fluency. Pupils should read and spell mathematical vocabulary, at a level consistent with their increasing word reading and spelling knowledge at key stage 1.

### Key Stage 2

#### Purpose of Study

Mathematics is a creative and highly interconnected discipline that has been developed over centuries, providing the solution to some of history's most intriguing problems. It is essential to everyday life, critical to science, technology and engineering, and necessary for financial literacy and most forms of employment. A high-quality mathematics education therefore provides a foundation for understanding the world, the ability to reason mathematically, an appreciation of the beauty and power of mathematics, and a sense of enjoyment and curiosity about the subject.

#### National Curriculum

**Lower Key Stage 2** - The principal focus of mathematics teaching in lower key stage 2 is to ensure that pupils become increasingly fluent with whole numbers and the 4 operations, including number facts and the concept of place value. This should ensure that pupils develop efficient written and mental methods and perform calculations accurately with increasingly large whole numbers.

At this stage, pupils should develop their ability to solve a range of problems, including with simple fractions and decimal place value. Teaching should also ensure that pupils draw with increasing accuracy and develop mathematical reasoning so they can analyse shapes and their properties, and confidently describe the relationships between them. It should ensure that they can use measuring instruments with accuracy and make connections between measure and number.

By the end of year 4, pupils should have memorised their multiplication tables up to and including the 12 multiplication table and show precision and fluency in their work.

Pupils should read and spell mathematical vocabulary correctly and confidently, using their growing word-reading knowledge and their knowledge of spelling.

**Upper Key Stage 2** - The principal focus of mathematics teaching in upper key stage 2 is to ensure that pupils extend their understanding of the number system and place value to include larger integers. This should develop the connections that pupils make between multiplication and division with fractions, decimals, percentages and ratio.

At this stage, pupils should develop their ability to solve a wider range of problems, including increasingly complex properties of numbers and arithmetic, and problems demanding efficient written and mental methods of calculation. With this foundation in arithmetic, pupils are introduced to the language of algebra as a means for solving a variety of problems. Teaching in geometry and measures should consolidate and extend knowledge developed in number. Teaching should also ensure that pupils classify shapes with increasingly complex geometric properties and that they learn the vocabulary they need to describe them.

By the end of year 6, pupils should be fluent in written methods for all 4 operations, including long multiplication and division, and in working with fractions, decimals and percentages.

Pupils should read, spell and pronounce mathematical vocabulary correctly.

**Progression of knowledge of skills – Number and Place Value**

Strand	1	2	3	4	5	6
<b><u>Number and place value</u></b>	<ul style="list-style-type: none"> <li>count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number</li> <li>count, read and write numbers to 100 in numerals; count in multiples of 2s, 5s and 10s</li> <li>given a number, identify 1 more and 1 less</li> <li>identify and represent numbers using objects and pictorial representations including the number line, and use the language of: equal to, more than, less than (fewer), most, least</li> <li>read and write numbers from 1 to 20 in numerals and words</li> </ul>	<ul style="list-style-type: none"> <li>count in steps of 2, 3, and 5 from 0, and in 10s from any number, forward and backward</li> <li>recognise the place value of each digit in a two-digit number (10s, 1s)</li> <li>identify, represent and estimate numbers using different representations, including the number line</li> <li>compare and order numbers from 0 up to 100; use &lt;, &gt; and = signs</li> <li>read and write numbers to at least 100 in numerals and in words</li> <li>use place value and number facts to solve problems</li> </ul>	<ul style="list-style-type: none"> <li>count from 0 in multiples of 4, 8, 50 and 100; find 10 or 100 more or less than a given number.</li> <li>recognise the place value of each digit in a 3-digit number (100s, 10s, 1s)</li> <li>compare and order numbers up to 1,000</li> <li>identify, represent and estimate numbers using different representations</li> <li>read and write numbers up to 1,000 in numerals and in words</li> <li>solve number problems and practical problems involving these ideas</li> </ul>	<ul style="list-style-type: none"> <li>count in multiples of 6, 7, 9, 25 and 1,000</li> <li>identify 1,000 more or less than a given number</li> <li>count backwards through 0 to include negative numbers</li> <li>recognise the place value of each digit in a four-digit number (1,000s, 100s, 10s, and 1s)</li> <li>order and compare numbers beyond 1,000</li> <li>identify, represent and estimate numbers using different representations</li> <li>round any number to the nearest 10, 100 or 1,000</li> <li>solve number and practical problems that involve all of the above and with increasingly large positive numbers</li> <li>read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of 0 and place value</li> </ul>	<ul style="list-style-type: none"> <li>read, write, order and compare numbers to at least 1,000,000 and determine the value of each digit</li> <li>count forwards or backwards in steps of powers of 10 for any given number up to 1,000,000</li> <li>interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers, including through 0</li> <li>round any number up to 1,000,000 to the nearest 10, 100, 1,000, 10,000 and 100,000</li> <li>solve number problems and practical problems that involve all of the above</li> <li>read Roman numerals to 1,000 (M) and recognise years written in Roman numerals</li> </ul>	<ul style="list-style-type: none"> <li>read, write, order and compare numbers up to 10,000,000 and determine the value of each digit</li> <li>round any whole number to a required degree of accuracy</li> <li>use negative numbers in context, and calculate intervals across 0</li> <li>solve number and practical problems that involve all of the above</li> </ul>

### Implementation

- Our implementation is developed through secure understanding of the curriculum and subject area.
- Children will have access to a wide range of resources to ensure that a concrete understanding of learning is accessible for all learning including those with SEND.
- A clear and effective scheme of work that provides coverage in line with the National Curriculum (school curriculum in-line with the national curriculum). The White Rose Maths curriculum is used for long-term and medium-terms planning. However, teachers can make their own judgements for time constraints and can use other resources alongside the curriculum.
- Teaching and learning should facilitate progression across all key stages within the strands included in this document. Children will have the opportunity to explore and respond to wider investigation such as using statistics around the world to understand trends and patterns.
- Wider Curriculum links and opportunities to explore maths in jobs – Investigations, CCCC opportunities, educational visits and visitors to the school.
- The knowledge and understanding of maths is shown through displays within the learning environment (classrooms, hall and wider school).
- Sharing work with families via the Class Dojo Platform for the children to talk further their understanding at home.
- As well as opportunities underpinned within the scheme of work, children will also spend time further exploring maths in other areas of the school – forest school/beach school.

### Impact

- Children will be confident mathematicians and be able to use and apply a wide range of skills across the curriculum.
- Children will have a secure and comprehensive knowledge of maths and how they can apply these to real-life problems.
- Children will be fluent in all areas of maths and be confident of their own ability.
- Children will be enthusiastic about their learning of maths and talk about how it will impact on their lives in the future.
- Children have the flexibility and fluidity to move between different contexts and representations of mathematics.
- Teachers deliver quality teaching and learning throughout the school giving children opportunities they may not have experienced before.
