

# Early Number Sense

At Cayton Primary School, we have a significant focus on the conceptual understanding of number from an early age to help the children to grasp concepts later on throughout the school. This means that there is an emphasis on the number from 1-20. Although children may be able to count up to 20, they may not necessarily have the conceptual understanding of what it means.

In this video, it explains the importance of this understanding and why it is needed. This will help you to understand why we have such a focus on the numbers we do in our curriculum.
